

I currently pay about 10.00 (and gladly) to listen to XM radio. When I am driving to work (about 45 minutes) and turn on the radio, I want to hear MUSIC for that 45 minutes, not 20 minutes of advertising. When I want to hear a traffic report as I am moving toward my destination, I want it and need it right then, not after 10 minutes of advertising for stuff I could care less about. I am totally sick and tired of listening to and watching ADVERTISING during the short periods of time I have in between my daily "duties" to enjoy some audio or visual entertainment. I can't believe that this NAB group has chosen to waste their time trying to shut down XM instead of cleaning up the GARBAGE we have to listen to on public radio stations, the same crap songs over and over, the force fed messages and too much advertising. CS
